Object : Application for internship position at Data Market within the IAESTE Exchange Program

Dear Hiring Manager

Currently a 4th year Computer Science Engineering student at the National School for Computer Science (ENSI), one of the most prestigious engineering schools in Tunisia, and north Africa, I am writing this letter to express my motivation to join your team as a cloud computing intern.

Being passionate about problem solving, algorithms and data structures I am very interested in this internship offer and working in Data Market, one of the leading companies in the information industry in Turkey and is one of the biggest business partners of HP and Microsoft.

I have chosen to pursue a degree in Computer Science Engineering and I have therefore followed different courses, which allowed me to deepen my knowledge in this field and gain multiple technical skills. Serious and pragmatic, the experiences that I have acquired during the various projects that I have worked on, have allowed me to approach Computer Science in a national and international context and to carry out missions in perfect autonomy.

I have always been attracted to Machine learning and cloud computing and I have always been curious and self-taught. I would now like to direct my career towards cloud computing and joining your company within the framework of an internship would be a great opportunity for me to discover this profession and its missions.

Furthermore, discovering turkey has always been a dream of mine. The country that in my opinion occupies one of the most unique geographic positions lying partly in Asia and partly in Europe. I am also very intrigued by historical monuments that describe perfectly the big diversified cultural background of the country. I am sure that Turkey will be the perfect destination for me.

Thank you for your consideration.

I am at your disposal for any further information.

Yours sincerely,
